

AMENDMENTS TO THE CLAIMS

Sub B7 (Currently Amended) A lottery ticket distribution system including:

- AZ
- (a) a ticket distribution center including an electronic ticket storage device for storing a game set comprising a number of electronic lottery tickets, each electronic lottery ticket being represented by ticket data that includes at least a result and a ticket identifier associated with the respective electronic lottery ticket;
 - (b) a ticket record manufacturing device operatively connected with the ticket distribution center and located at a secure location inaccessible to game players, the ticket record storage manufacturing device for producing a non-volatile data record or a hard copy ticket record for each electronic lottery ticket in the game set, and being distinct from the electronic ticket storage device;
 - (c) a player terminal for receiving from the ticket distribution center the ticket data representing one of the electronic lottery tickets, the player terminal residing at a location remote from the ticket distribution center;
 - (d) a player ticket printer included with the player terminal, the player ticket printer for printing a player ticket with the result and a ticket identifier included in the respective ticket data; and
 - (e) a communications arrangement for facilitating the communication of the ticket data from the ticket distribution center to the player terminal and for facilitating the communication of a ticket request from the player terminal to the ticket distribution center.

- 
2. (Original) The system of Claim 1 wherein the ticket record manufacturing device comprises a hard copy printer that produces the hard copy ticket record for each electronic lottery ticket in the game set.
 3. (Original) The system of Claim 1 wherein the ticket record storage device comprises an optical disc writer that produces the non-volatile data record for each electronic lottery ticket in the game set.
 4. (Original) The system of Claim 1 further including a display operatively connected to the player terminal for displaying the result included in the respective ticket data in response to a player input at the player terminal.
 5. (Original) The system of Claim 1 wherein the ticket distribution center includes a manufacturing computer for manufacturing the game set.
 6. (Currently Amended) A method for distributing lottery tickets, the method including the steps of:
 - (a) at a ticket distribution center, storing a game set comprising a number of electronic lottery tickets, each electronic lottery ticket being represented by a respective collection of ticket data that includes at least a result and a ticket identifier associated with the respective electronic lottery ticket;

- 12
- (b) producing a game set record at a secure location and securing the game set record from access by game players, the game set record comprising a set of non-volatile data records including a respective data record for each respective electronic ticket in the game set or comprising a set of hard copy ticket records including a respective hard copy ticket record for each respective electronic ticket in the game set;
 - (c) communicating the ticket data representing one of the electronic tickets over a communication arrangement from the ticket distribution center to a player terminal at a location remote from the ticket distribution center;
 - (d) at the player terminal location, printing a player ticket with the result and ticket identifier included in the respective ticket data communicated from the ticket distribution center to the player terminal; and
 - (e) at the player terminal location, displaying a representation indicating the result included in the respective ticket data communicated from the ticket distribution center to the player terminal.
7. (Original) The method of Claim 6 further including the step of generating the game set at the ticket distribution center.
8. (Original) The method of Claim 6 wherein the step of communicating the ticket data representing one of electronic tickets is performed in response to a player input at the player terminal.

9. (Original) The method of Claim 6 further including the step of storing the respective ticket data while different ticket data representative of a different one of the electronic lottery tickets is printed on a different player ticket in response to a play request entered through the player terminal.
10. (Original) The method of Claim 6 further including the step of storing the respective ticket data while different ticket data representative of a different one of the electronic lottery tickets is printed on the player ticket in response to a play request entered through the player terminal.
11. (Original) The method of Claim 6 further including the steps of:
- (a) communicating different ticket data representing a different one of the electronic tickets over the communication arrangement from the ticket distribution center to the player terminal;
 - (b) at the player terminal location, printing the player ticket with the result included in the additional ticket data; and
 - (c) at the player terminal location, displaying a representation indicating the result included in the additional ticket data.
12. (Original) The method of Claim 11 further including the step of ejecting the player ticket in response to an end play signal.
